SUMMARY

I'm a Junior WordPress Developer with hands-on experience in creating user-friendly and functional websites. I've worked on different types of projects like e-commerce stores, school management systems, and business marketing websites using WordPress, Elementor, and WooCommerce. Along with that, I've gained a good understanding of HTML, CSS, Bootstrap, PHP, MySQL, JavaScript, and jQuery. By doing real projects and learning step by step, I've built a strong grip on both front-end and back-end development. You can also explore some of my PHP and Laravel projects on my GitHub: https://github.com/shahsawar28032. Now I'm looking for a chance to work with a team where I can grow, learn more, and contribute with my skills.

EXPERIENCE
SELF-EMPLOYED

Junior WordPress Developer   01/2024 to Current
Junior WordPress Developer (Project-Based)
